

Binocular Bino-Glove™ Case and Neckstrap Installation

The patented Brunton, interactive, Bino-Glove case allows you to carry and use the binocular while in its Bino-Glove with the case cover snapped in place, or removed.

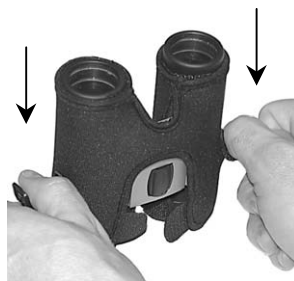

Placing binocular in the case

1. Remove case, binocular and neckstrap from box.
2. On the case cover, unclip the compression clip, and unsnap case cover from the case body.
3. Place binocular on table with **BRUNTON** logo upside down (**step 1, below**).
4. Undo both of the Velcro pieces on the case body.
5. Slide case body over binocular so the bridge on case body covers the **BRUNTON** logo, but does not cover the focus wheel (**step 2**).
6. Reattach both Velcro pieces.
7. Collapse binocular so that both barrels touch each other.
8. Snap case cover to the case body, and rotate cover until it will fit over the case body.
9. Fit the case cover over the case body, and re-clip the compression clip, as shown in **step 3**.

Step 1

Step 2

Step 3

Connecting neckstrap to the binocular case

1. With binocular in its case, place one end of neckstrap through the top end of the "H" clip (**step 4**).
2. Loop strap through the bottom end of the "H" clip, and pull through (**step 5**).
3. Repeat process for the opposite side of the binocular case.
4. Adjust both ends of neckstrap until the binocular and the neckstrap fit comfortably around your neck.

Step 5
